

Provost and Vice President for Academic Affairs Pamela Zarkowski will receive the 2017 William J. Gies Award for Outstanding Achievement by a Dental Educator. The prestigious award was established by the American Dental Education Association (ADEA) Gies Foundation in 2008 and exemplifies the highest standards in oral health and dental education, research and leadership. The 2017 Gies Awards will be presented on March 20, 2017 in Long Beach, California.

Zarkowski's research focuses on legal and ethical professional development, leadership, community dentistry and workplace climate. She has held various administrative positions prior to her current position, including Executive Associate Dean at the Detroit Mercy School of Dentistry.

"I am both honored and humbled to be recognized for doing what I am passionate about, teaching and working with outstanding colleagues in dental, dental hygiene and graduate education," she said. "I am fortunate to have been able to teach students for more than 37 years and have had multiple opportunities to work with colleagues at the University of Detroit Mercy, as well as colleagues on the national and international level in the areas of ethics and professionalism."

Zarkowski has taught in both the ADEA Leadership Institute and the ADEA Allied Leadership Institute and held a number of leadership positions in her field including president of the American Dental Education Association (ADEA), the first president of the ADEAGies Foundation and is currently president of the American Society for Dental Ethics (ADSE).

She received a bachelor's of science degree in dental hygiene, a Master's of Public Health and Teaching Certificate in Community Dentistry from the University of Michigan and a Juris Doctor degree from the Wayne State University School of Law. She was among one of the first women in dental education to complete a year-long executive leadership fellowship program for women in academic medicine (ELAM).

"Pam has distinguished herself with teaching, scholarly activities and service to the profession," said Mert N. Aksu, Dean of the Detroit Mercy School of Dentistry. "She has been a mentor for numerous dental hygienists, dentists and graduate students, as well as her peers, and has been described as an exemplar for her contributions as a colleague, role model and change agent in our profession which makes her most deserving of the William Gies Award for Outstanding Achievement as a Dental Educator."

Associate Professors Katherine Moran and Rosanne Bur-

portance to scholars in several disciplines, mastery of extensive literature, research findings handled with skill and assurance, authority in interpretation, objectivity, readability and imagination. Judging is heavily-weighted toward research and scholarship.

Judges praised the book, stating that it "is presented in a way that is principled to the highest standards of the profession but in a way that is objective and authentic. The appeal is to a wide audience beyond the nursing profession, including social work, psychology and other mental health professions. The extant research is ably integrated with easy-to-understand analysis, graphics and practical recommendations."

The Doctor of Nursing Practice Scholarly Project is the first resource of its kind to guide students in the successful completion of a scholarly project, which is a universal requirement for any doctor of nursing practice candidate.

The text develops a process and framework for completing the project in an effective and efficient manner. It focuses on important aspects such as formulating a meaningful scholarly project, selecting appropriate committee members and working effectively with them, understanding the positive influence of professional collaboration on the final product, developing a project plan and writing the project proposal, and emphasizing how research contributes to evidence-based practice in nursing.

The book will be included in the permanent collection of Marquette University's Raynor Memorial Library, and the awardee's names will be included in a permanent display at the Alpha Sigma Nu Central Office.

The Health Resources and Services

The short answer is yes, if you intend to publish your results. Any research intended to be generalizable, to contribute to the body of knowledge in the discipline, should be submitted to the IRB. However, educational research does not need to be reviewed by the full board. Pedagogical research is one of six categories of research considered 'exempt,' according to the federal Office of Human Research Protections (OHRP). This includes any research conducted in "established or commonly accepted educational settings, involving normal educational practices." Educational research conducted in K-12 and college classrooms, for example, would meet this definition. After school programs, preschools, day care centers, vocational schools, or alternative education programs which are affiliated with K-12 schools or colleges would likewise qualify. Normal educational practices would include, for example, research on instructional strategies or research on the effectiveness of instructional techniques, curricula, or classroom management methods. It may also include surveys or tests that teachers commonly give to measure the effectiveness of an educational practice.

For most exempt applications, no signed informed consent form is required from participants. If the research

presents no more than minimal risk to subjects and involves no procedures for which written consent is normally required, you are not required to document consent. In cases where the documentation is normally required, you must document consent in the research protocol.

Office of Human Research Protections, OHRP

t

The GRT was created to connect non-tenured faculty with colleague mentors who have an established record of success in obtaining external grant funding.

Mentoring can take several different forms:

- individual consultations prior to beginning work on a major grant proposal,
- questions about specific sections of the proposal,
- critiques of one-page overviews, or
- critiques of complete proposals.

Profiles of GRT members, including agencies which have funded their work, keywords for their research interests, and recent publications, can be found on the OSPRA website:

<http://www.udmercy.edu/academicaffairs/ospra/grantsreviewteam/index.htm>

UDM faculty names are bolded and UDM student names are italicized.

Please note that the library keeps more comprehensive lists of faculty publications over time. Please see the website at <http://research.udmercy.edu/achievement/>
